

Dear Residents & Businesses,

The Town of Cedarburg will be treating 18 roads with GSB-88 Sealer to preserve the pavement and extend the life of our roadway investment.

Treatment is scheduled from:

Please note the following important instructions:

- **Notifications & Access:** This is your first notification. A second notification of a yellow door hanger will be placed on your door the day or night before work begins on your road. The crew will also go door-to-door prior to application to ensure you are not trapped in your driveway. Your road may be closed for a few hours during application.

- **Driving:** Do not drive on the wet material, as it will splatter on your vehicle and track onto your driveway. We recommend waiting 2–3 hours for the material to cure before returning to your driveway.

- **Parking:** Please remove all parked vehicles from the street between 7:00 a.m. and 7:00 p.m.

- **Scheduling & Sprinklers:** Please turn off any lawn sprinklers that wet the street. We also recommend rescheduling any deliveries, contractors, or landscapers during this period.

- **Delays:** Rain or equipment issues may delay the work to subsequent days.

Crew members will be available on-site to answer questions.

Thank you for your cooperation.

Fahrner Asphalt Sealers, LLC

(PLEASE SEE BACK OF NOTICE FOR ROADS TO BE COMPLETED)
